

## **NEW TECHNOLOGIES IN OUR LIFE**

As we all know that we live in the age of science and technology. The life of every one of us highly depends on the scientific inventions and modern day technologies. Science and technology has changed the lives of people to a great extent. It has made life easy, simple and fast. In the new era, the science development has become a necessity to finish the era of bullock cart and bring the trend of motorized vehicles. Science and technologies have been implemented to the every aspect of modernization in every nation. Modern gadgets have been introduced to every walk of life and have solved almost all the problems. It was not possible to have all the benefits of it without implementing it in the sectors like medicines, education, infrastructure, electricity, aviation, information technology and other fields.

What improvement we are seeing in our life on daily basis is because of the science and technology. For the proper growth and development of the country, it is very necessary for science and technology to go hand in hand. Villages are getting developed to towns and towns to cities thus expanding the greater horizons of economy. Below there are some of the uses of technology today.

**HAPIfork** – In our everyday life we have to monitor our diet and what we eat, it is very essential to keep track of what you put inside your body. This HAPIfork is a smart fork that tracks your eating habits. For those who want to lose weight, this smart fork technology will help you eat healthier and it will also determine the speed at which you eat. If you monitor the speed at which you're eating, you will improve your digestion system and also reduce on your weight. HAPIfork will monitor and reduce the speed at which you eat your meals. This process will teach you to maintain healthier and smarter eating habits [5; 2].

**Space Monkey** – It is very important to keep your data secure and accessible from anywhere. Today we have many online data storage companies which provide you with limited space to store your data, they even limit you on which data to store on their cloud servers, now, this Space Monkey will cut out all that mess, it is a cool device which takes cloud data storage from remote data-centers and it brings it in your house or office, so you will be in control of what you store on Space Monkey. Forget about server loads or network threats, Space Monkey is safe and you will be in position to access your data remotely. When it comes to cost, you will spend only \$10 for 1000 Gigabytes of storage space [5; 3].

**Smartwatch** – Communication technology is advancing on a daily basis. In our daily lives we need to communicate and stay updated in real time. This Smartwatch will derive all important notification from your Smartphone to your wrist. This Smartwatch has almost every essential feature you will need to stay

updated, so why bother carrying the wide screen uncomfortable Smartphone when this simple wearable Smartwatch will bring you all calls, SMS, e-mails, and more notifications directly to your wrist. This is a cool technology for busy people who always want to stay updated. With this new technology, you can leave your Smartphone in your pocket or purse, and get all updates via this Smartwatch [5; 4].

**Flip Alarm clock** – Keeping time is very important in our daily lives; however, waking up in the morning is a disaster to most of us. This Flip Alarm clock uses a simple but cool technology to wake you up, with its big bold design, it comes with two sides – ON and OFF – which means that you can flip the clock on the side you need, then its advanced timing technology will sense when to wake you up, if the alarm starts making that wired noise to wake you up in the morning, you tell the clock to shut up by flipping it to the OFF side [5; 1].

**Luci Inflatable Solar Lantern** – Since light is essential in our lives, this Luci Inflatable Solar Lantern is among those new technologies every one will need in their lives. Take advantage of solar energy with this remarkable lightweight waterproof solar lantern. For those who love camping, this lantern will provide you with light during the night. If you charge it for 8 hours, you will get a minimum of 6–12 hour of light [5; 1].

**In conclusion:**

The use of technology is unmeasurable; technology has played a big role in many other fields like health care, job creation and data management. And this technology will keep on changing basing on the demands of people and the market. So it's your role to keep yourself up-to-date with trending technology. How we use technology determines if it's good or bad, helpful or harmful. Technology, itself, is neutral [5].

**ПРОБЛЕМНІ ПИТАННЯ ПРАВОВОГО РЕГУЛЮВАННЯ  
ФІСКАЛЬНОЇ ПОЛІТИКИ В УМОВАХ ЄВРО ІНТЕГРАЦІЇ**

На сьогодні фінансова політика в Україні переходить у якісно новий вимір розвитку, що певним чином викликає труднощі у її реалізації. Насамперед, такі труднощі пов'язані з необхідністю гармонізації вітчизняного податкового законодавства із законодавством ЄС,
